

Outdoor Emergency Lighting Inverter

Overview

What is an emergency lighting inverter?

An emergency lighting inverter is referred to as a 'UPS (Uninterruptible Power System)' for emergency lighting.

What is an emergency lighting backup inverter?

An emergency lighting backup inverter is a device that converts DC battery power to standard AC voltages to provide backup for various lighting systems, including fluorescent and LED lights, in an emergency.

Is an emergency lighting inverter UL924 listed?

When selecting an emergency lighting inverter, it is mandatory that the system is UL924 listed. UL924 ensures that the battery backup system has passed several critical discharge and recharge tests which are required for life safety.

Are emergency lighting inverters NFPA compliant?

Controlled Power Company has developed an entire line of NFPA and life safety code compliant emergency lighting inverters, in response to the new NFPA and life safety codes. With the advent of these codes, the use of emergency lighting inverters has become common place.
