

Outdoor base station installation method

Overview

How do I set up a base station?

Set up the base station using either the tripod or T-bar mounting method. You must use an external radio antenna kit for the internal 450 MHz or 900 MHz radio. To avoid interference between the 900 MHz radio and GPRS transmissions, do not mount the external radio antenna within 1 m (3.3 ft) of the GSM antenna.

How should a base station antenna be installed?

The hardware installation guidelines are limited but important for reliable base station performance. The base station antenna should be installed in open sky conditions, away from external influences that hinder the direct line of sight between the antenna and the GNSS satellites.

What is a dib-r5 outdoor base station?

The DIB-R5 outdoor is a base station suitable for outdoor and indoor operation. The DIB-R5 outdoor has been developed for outdoor operation under harsh conditions and can be flexibly mounted providing radio coverage exactly where it is needed.

Where should an antenna be installed?

In general, this means that the ideal antenna installation is near the centre of the work area. For larger work areas (several 10's of km's), it is advised to place several base stations for optimal performance and easy selection of the nearest base station.
