

# Pyongyang Organic solar Energy Storage Enterprise

## Overview

---

What are the energy storage projects in North China?

Energy storage projects in North China are currently the most in China. Due to the geographical environment, the power grid in Northwest China cannot supply power to all regions. Provide electricity to the people of the region through off-grid distributed generation and energy storage systems.

What is the energy storage model in Shandong province?

In February 2022, it officially became the first independent energy storage power station in Shandong province to pass the market registration. The energy storage ancillary service profit is 200 ¥/kWh, and the lease fee is 330 ¥/kWh, and the priority power generation incentive is 16 million ¥/year . 3.6. Shared energy storage model.

Who owns the energy storage system?

The grid subsidiary is the owner of the energy storage system. The third type is the third-party investment. Under this investment model, the energy storage system is invested and operated by third parties.

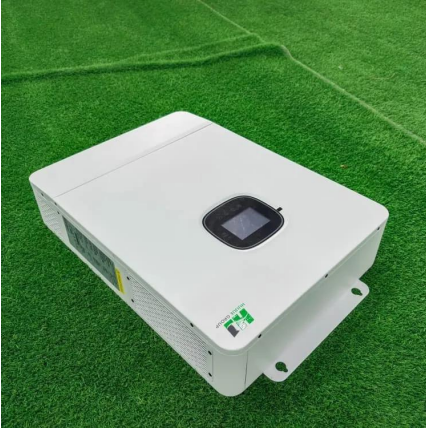

Why is energy storage important in North China?

North China has abundant wind power resources. Energy storage assists wind farms with the storage and transportation of electrical energy. Energy storage projects in North China are currently the most in China. Due to the geographical environment, the power grid in Northwest China cannot supply power to all regions.
