

# Requirements for replacing cells in new energy battery cabinets

## Overview

---

What are the customer requirements for a battery energy storage system?

Any customer obligations required for the battery energy storage system to be installed/operated such as maintaining an internet connection for remote monitoring of system performance or ensuring unobstructed access to the battery energy storage system for emergency situations. A copy of the product brochure/data sheet.

What are the removability and replaceability requirements for portable batteries?

Removability and replaceability requirements apply from 18 February 2027. When placed on the EU market, products incorporating portable batteries shall come with instructions and safety information on the use, removal and replacement of the batteries. This information shall be made available permanently online, on a publicly available website.

Do battery energy storage systems comply with building codes?

Building codes: Battery energy storage systems (BESS) must comply with local building codes and fire safety regulations, which can vary across different geographies and municipalities. These codes are governed by the National Fire Protection Association (NFPA) in the U.S. and the performance-based European Standards (EN) in the European Union.

How do I certify a battery energy storage system?

Provide a hardcopy and electronic copy of the battery energy storage system SDS. Provide a copy of NETCC consumer information guide. Provide customer with the name and licence/accreditation number of the tradesperson who designed/signed off on the installation.
