

Riyadh solar container outdoor power price standard

Overview

Could a power purchase agreement make large-scale solar projects viable in Saudi Arabia?

Saudi scientists have determined the current price threshold for power purchase agreements (PPA) that could make large-scale PV and wind power projects viable in Saudi Arabia. They incorporated data from the 300 MW Sakaka solar farm and four potential utility-scale PV project sites.

How much does a solar PV plant cost?

“The Sakaka solar PV plant operates under a 25-year PPA with an electricity price of \$23.40/MWh, while the Dumat Al Jandal wind farm has a 20-year PPA with an electricity price of \$21.30/MWh,” the researchers said, acknowledging that technical and financial details for the plants are not fully available.

How much NPV should a solar project cost?

They said that to achieve zero NPV values, the other identified sites for solar deployment should host projects requiring PPA prices ranging from \$26.10/MWh to \$29.30/MWh.
