

Rooftop solar panels collapsed

Overview

What happened to rooftop solar?

Basically, utilities fought back and eliminated the ability for homeowners to sell excess electricity back into the grid. This is great for utilities and their shareholders, but it hurts the economics of rooftop solar, resulting in the predictable collapse of the market. This was a policy disaster of epic proportions. Legitimate installers.

Is the US residential solar industry on the brink of collapse?

From pv magazine USA The US residential solar industry may now be on the brink of collapse. Facing macroeconomic challenges and shifting state and federal policies, an industry once defined by double-digit growth in installations is now experiencing steep declines - and the latest draft of the One Big Beautiful Bill Act makes conditions even worse.

Why is the solar rooftop business so hard?

The reason the past 12 months have been hard on the solar rooftop business is the elimination of net metering 2.0 last year in the largest solar rooftop market: California. Basically, utilities fought back and eliminated the ability for homeowners to sell excess electricity back into the grid.

Why is the solar industry crashing?

Causing an industry-wide collapse. There's a ton of fraud in the solar industry. The biggest fraud is the whole "lease your roof" concept where you can get a solar panel on your roof for a really low price - because you're paying inflated electric prices.
