

San Jose solar Module Project

Overview

The 19.6-megawatt San Jose Solar Power Project (SJSPP) has secured its Final Certificate of Approval to Connect (FCATC) from the National Grid Corporation of the Philippines (NGCP) as of April 14, 2025, clearing the path to deliver clean power to thousands of households in Luzon. What is PGEC's San Jose solar project?

The San Jose Solar project is the latest in PGEC's portfolio of renewable energy investments, pushing forward its clean energy commitment in Luzon. Follow Power Philippines on Facebook and LinkedIn for more updates on project milestones and clean energy developments.

How many solar panels does rgec use?

RGEC is a joint venture between PGEC and Japan's Taisei Corp. The plant, officially inaugurated on April 24 in San Jose City, Nueva Ecija, uses over 29,000 solar panels from Trina Solar and 51 Huawei string inverters, with a nominal capacity of 300 kilowatts each.

How much electricity will sjgec generate a year?

The project is expected to generate about 29 gigawatt-hours of electricity annually, enough to supply around 30,000 households and displace an estimated 20,400 tons of carbon emissions per year. SJGEC filed for a Certificate of Compliance (COC) with the Energy Regulatory Commission (ERC) on April 15.
