

Serial number of the uninterruptible power supply

Overview

Where can I find a serial number for my uninterruptible power supply?

You will need a serial number. The serial number is usually on the nameplate sticker on the uninterruptible power supply system. This cookie is set by GDPR Cookie Consent plugin. The cookie is used to store the user consent for the cookies in the category "Analytics".

What is an uninterruptible power supply?

The uninterruptible power supply is the IBM type 9910. The IBM 9910 uninterruptible power supply solutions are compatible with the power requirements for System i and System p servers and have passed IBM testing procedures. The uninterruptible power supplies are intended to provide a single source for purchase and protection of IBM servers.

How long does an uninterruptible power supply run?

We know that that the Uninterruptible Power Supply can support the load demand of 270W since it's less than the Watts Power Rating of 300W. We can calculate the amperage of the load on the UPS from formula (3). $270W / 12V = 22.5A$. Therefore the UPS runtime expected would be $2.9AH / 22.5A = 0.13hrs$ or 7 minutes 44 seconds.

What is interruptible online power supply (UPS)?

interruptible Online Power Supply (UPS) Power ProtectionDa interruptible Online Power Supply (UPS) Power ProtectionD action for systems and data - powerful and reliable (APC SURT Gen2)UPS devices ensure high-performance power supply protection for systems and data, and thus provide reliable protection ag
