Shanghai New Energy Storage Project

Overview

Will Tesla build a grid-side energy storage station in Shanghai?

SHANGHAI, June 21 (Xinhua) -- U.S. carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries.

Will Tesla's Shanghai megafactory reshape energy storage?

The rapid construction and future operations of Tesla’s Shanghai Megafactory are poised to reshape the landscape of energy storage solutions. From breaking new ground in international expansion to setting ambitious production goals, Tesla’s latest project promises to fortify its global presence and enhance its manufacturing prowess.

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla’s first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.

How much energy does the Shanghai megafactory produce a year?

Pushing Manufacturing Limits With plans to produce up to 10,000 Megapacks annually, the Shanghai Megafactory is setting a high bar in energy storage manufacturing. This equates to nearly 40 GWh of energy storage capacity, reinforcing Tesla’s commitment to sustainability and clean energy solutions.
