

Solar container communication station low voltage distribution cabinet GGD solar plant

Overview

The GGD type AC low-voltage distribution cabinet is suitable for power distribution systems of power plants, substations, industrial and mining enterprises, and other electrical users with an AC frequency of 50Hz, a rated operating voltage of 380V, and a rated operating current up to 3150A. What is a GGD AC low-voltage distribution cabinet?

For low-voltage solar power stations that are connected to the grid, the PV grid connected cabinet can also incorporate additional devices for functions like measurement and protection. GGD AC low-voltage distribution cabinets are suitable for power plants, substations, and industrial enterprises.

What is PV Grid connected cabinet?

IPKIS presents PV grid connected cabinet, a crucial part of solar systems that acts as the main connection point between a solar power station and the electrical grid.

What is GGD low voltage switchgear?

1. Product Overview GGD low-voltage switchgear is suitable for power distribution system of AC 50 Hz, rated working voltage 380 V and rated working current 3150 A in power plants, substations, and industrial enterprises, etc. It is used as lighting, electric energy conversion, distribution and controlling of distribution equipment.

What is a low-voltage distribution cabinet?

The device is a innovative type of low-voltage distribution cabinet that is in line with the safety, economic, reasonable and reliable principles. The product has high capability of breaking, high thermal stability, flexible electrical scheme, convenient combination, seriation, high practicability, innovative structure, high protection grade, etc.
