Does the EU solar sector continue to grow?

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, and the technology's central role in the continent's clean energy transition. Source: [eepowerschool.com](https://www.eepowerschool.com).

Can European solar production underpin resilience?

A new market analysis from SolarPower Europe highlights the potential of European solar production to underpin the resilience of the European sector. SolarPower Europe has published a new report mapping Europe's solar PV module production equipment capacity.

Will solar power grow in Europe in 2024?

Despite these record figures, SolarPower Europe forecasts much lower growth rates from 2024. According to the market survey, 2023 was the best year for solar power for 20 of the 27 EU member states, including 14 countries that installed 1 or more GW. The combined installed capacity in the EU now amounts to 263 GW.
