

Solar energy system application in Finland

Overview

Does Finland need wind power?

In addition to wind power, we also need plenty of solar energy, for which Finland has excellent prospects. Solar power is particularly well suited as a counterpart to wind power. These two emission-free energy sources complement each other: solar energy is available in summer and during the day, while the highest winds occur on average in winter.

Is solar power a real thing in Finland?

Many Finns are already familiar with solar power: solar panels can be found on the roofs of many homes, summer cottages and workplaces. As technology develops, industrial-scale solar power production is also becoming more common in Finland. Finland is undergoing a major energy transition.

Why should you choose solar Finland?

Solar Finland and its subsidiaries with strong long-term background are experts in all aspects of solar energy. Our extensive know-how and experience of over 40 years make it possible to develop in different areas making our products and services competitive in the solar energy markets both domestically and abroad.

How will a hybrid energy system work in Finland?

In Finland, a number of hybrid projects are in the pipeline, combining wind, solar and also energy storage. These solutions will balance our energy system. On a global scale, solar power is one of the fastest growing forms of energy generation – its size and importance in the world's energy mix is huge, larger than wind power.

Solar energy system application in Finland

[Finland Solar Power Market Outlook to 2030](#)

Nov 5, 2025 · The Finland solar power market is set to grow significantly, with installed capacity projected to reach 9.04 GW by 2030, up from 1 GW in 2023. This expansion is fueled by ...

[Environmental impacts of large-scale solar power](#)

Jan 20, 2025 · Through three case studies of recently built large-scale solar photovoltaic installations, the research highlights significant variances in environmental impacts associated ...

[Northern lights, solar sights: Finland's surprising solar surge](#)

Finland is emerging as a northern solar energy leader, with around 300 industrial-scale projects in the pipeline. Discover how researchers and companies are turning low sunlight into high ...

[Solar energy and solar electricity in Finland](#)

Apr 18, 2023 · Solar energy and solar electricity in Finland Contrary to popular belief, Finland's solar energy potential doesn't fall short of that of Central Europe. In the summer, the long days ...

Economic viability of large-scale solar PV implementation in...

Solar energy is crucial for the energy transition in the Nordic region; however, high penetration levels pose significant economic challenges. The lack of feed-in tariffs for solar PV, limited ...

Solar Power in Finland: Growth, Subsidies & Future Goals

Jul 18, 2025 · Explore the rapid growth of solar power in Finland, backed by EUR16.6M in subsidies. See how Finland's solar energy strategy is paving the way to carbon neutrality.
