

Solar inverter home use

Overview

Do you need a solar inverter?

Solar inverters are a necessary but often forgotten part of a home solar panel system since they convert sunlight into usable electricity for your home appliances. Without a solar inverter, you wouldn't be able to use those solar panels to power your home.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

What does a solar inverter do?

A solar inverter's main function is to switch DC power created by solar panels into AC power that's usable for your home appliances. They also collect and transmit valuable data to help you monitor the production and health of your solar system.

How long does a solar inverter last?

One of the more expensive inverters on the market but still lasted only one year. Find the best solar inverter for your home based on expert and consumer reviews. Inverters maximize solar panel output and convert power from DC to AC, making them an integral part of home solar power systems.
