

# Solar inverter protection frame

## Overview

---

Why is inverter protection important?

Inverters are commonly used in renewable energy systems, such as solar panels and wind turbines, to convert the DC power generated by these sources into AC power that can be used in homes and businesses. Inverter protection is important to ensure the longevity and reliability of the inverter.

What is a PV inverter shelter wall?

Using the PV Inverter Shelter Wall, you have the ability to safely install your inverter outdoors. This effectively eliminates the presence of dangerous DC voltage, ensuring that your solar panel array is Scope 12 compliant and meets all safety regulations.

What is PV inverter shelter Slim?

The PV Inverter Shelter Slim is a smart and affordable protection for inverters, built with our existing materials for optimal price, performance and ease of installation. The shelter consists of: 2x Alu. Side++ profile L=1400 mm.

What types of protection can be used to protect inverters?

There are several types of protection that can be used to protect inverters:  
Surge protection: This type of protection is designed to protect the inverter from power surges and voltage spikes.  
Overload protection: This type of protection is designed to protect the inverter from being overloaded.
