

# Solar panel roof bulk material

## Overview

---

What is the best roof material for solar panels?

Solar panels are devices that harness solar energy into usable electric energy. The best roof material for solar panels are- 1. Asphalt Shingles (Composite)  
This is the most common roofing material as it is durable, affordable, and flexible. Depending on your location and the quality of shingles, asphalt roofs may last for about 12 to 30 years.

What are 'in roof' solar panels?

'In roof' solar panels are also referred to as 'roof-integrated'. Firstly, it's worth noting that 'In roof' is a bit like 'on-roof'. The panels are generally the same. However the major difference being that with in-roof solar panels, the panels are serving as both the roof covering and producers of electricity.

Are all roofs suitable for solar panels?

Yes, all roofs are suitable for solar panels as long as they are durable and have enough strength to bear the weight of a solar panel system. Solar panel systems last for 25 years or more, therefore your roof must be strong enough to handle it at least for that time period.

Does tar & gravel roofing work with solar panels?

This roofing also works well with solar panel systems as they are energy efficient because gravel reflects sunlight plus, they are supportive. The average lifespan of tar and gravel roofing is around 20 to 30 years and their patching or repairing is easily done if required due to any damage.
