

Solar powered devices factory in Melbourne

Overview

Where are Australian solar modules made?

Australian Solar Manufacturing Pty Ltd is the pioneer company to specialise in the production of high-powered 190-200 watt solar modules in Australia, modules are assembled with imported raw materials such as EVA, TPT, Junction Box, Glass, Silicone, Aluminium frame and solar cell. Components are sourced from Germany, Japan, USA and China.

What is the current landscape of solar technology manufacturers in Australia?

Let's dive into the current landscape of solar technology manufacturers in Australia. Australia has a rich solar research and development history, but establishing a solid domestic manufacturing sector has proven difficult. Historically, Australian solar manufacturers have faced stiff competition from overseas producers who offer cheaper panels.

Who makes solar panels in Australia?

Trina Solar is a global solar panel manufacturer with strong presence in Australia, offering high-performance PV modules and smart energy solutions. 7. SolarHub SolarHub is an Australian-owned clean energy company providing solar panels, storage, and EV charging solutions nationwide. 8. Smart Energy Group.

How can Australia support local solar production?

Recognising the strategic importance of the domestic solar industry, the Australian government has launched several initiatives to support local production. Tindo Solar is an Australian-owned manufacturer that produces solar panels domestically. Established in 2011, they prioritise high quality by assembling panels with international components.
