

Somalia computer room UPS uninterruptible power supply equipment

Overview

What is uninterruptible power supply (UPS)?

For instance, when designing server rooms, they require uninterruptible power supply (UPS) systems that deliver complete power protection for critical IT applications. These components must also be able to accommodate growth and expansion while maintaining cost-effective performance.

Which is the best uninterruptible power supply manufacturer?

With 20 years of R&D experience in UPS industry, SCU, one of the biggest uninterruptible power supply manufacturers, provides 6KVA to 900KVA UPS products that are highest levels of availability, reliability and efficiency. SCU UPS products cover applications from IT rooms to large data centers and industrial plant and so on.

What is a server room UPS system?

In most cases server room UPS systems will be of the online double conversion type, although line-interactive UPS can also be used in certain rackmount applications. As computing requirements grow, so will a server room's power requirements.

Does your ups system work if your primary supply goes down?

Our UPS systems integrate seamlessly into data centers to deliver consistent, efficient power, even if your primary supply goes down. As technology advances, so does the demand for uninterrupted power. While there have been great advancements in the power grid, there are still vulnerabilities that allow for outages and fluctuations in flow.
