

Split solar system

Overview

What is a split Solar System?

Split solar system designed for cooler climates and all weather conditions. Reduces water heating energy use for households with Medium Loads by: up to 65%* For 70 years, Solahart has been Australia's solar pioneer, helping Aussies save on energy bills with our innovative smart solar solutions. Get smart, Get Solahart.

What is a split system solar water heater?

Split system solar water heaters are a smart and flexible way to harness the sun's energy without a bulky roof-mounted tank. In this setup, the solar collectors are installed on the roof, while the hot water storage tank is positioned at ground level, making it ideal for homes with limited roof space or aesthetic requirements.

What is a solar mini split?

So what makes it solar?

A solar mini split is simply a mini split system powered by solar energy, either directly from solar panels or indirectly through battery storage. Some systems are built for direct DC solar input, while most standard models run on AC power, which means you'll need an inverter to power them from solar panels.

What is a hybrid solar mini split unit?

The Hybrid Solar Mini Split Unit is ideal for expanding or upgrading your system. It includes the A/C unit only and integrates with both solar and grid power. Direct Solar Power is a supplier solar systems for homes and businesses across the USA with a focus quality support. Call 848-600-6420 to start your project today!
