

# **The Netherlands Rotterdam solar energy storage subsidy**

## Overview

---

Netherlands' climate minister has allocated €100 million in subsidies to the deployment of 'time-shifting' battery storage with solar PV projects for next year, an acceleration of a larger €400 million-plus programme. Will the Netherlands support battery storage in solar PV projects?

Netherlands recently announced €100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

Why did the Dutch government grant €100 million to solar PV projects?

Image for representation purposes only. The Dutch government recently announced €100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

How much money does the Netherlands spend on battery energy storage?

Netherlands' climate minister has allocated €100 million in subsidies to the deployment of battery energy storage system (BESS) technology.

How much does the Dutch government pay for battery storage?

The Dutch government has earmarked €100 million (\$106.7 million) of subsidies for the deployment of battery storage alongside PV projects. The funds are part of a €416 million subsidy program announced last year to alleviate grid congestion.
