

Three-phase uninterruptible power supply in Sydney Australia

Overview

What is a 3 phase UPS?

A 3-Phase UPS, also known as a three-phase uninterruptible power supply, is a robust power protection solution designed for industrial, commercial, and data center applications with higher power demands. Unlike a 1-Phase UPS, which operates with single-phase power, a 3-Phase UPS utilizes a three-phase electrical system.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) is a device that offers battery backup in the event the main electrical supply fails or drops. Smaller UPS systems deliver power for a few minutes or so – just enough time to save any important files and shut down the computer properly. Larger systems have enough power to last several hours.
