

UAE Dubai 2025 solar Energy Storage Policy

Overview

How much solar power will the UAE have by 2032?

In the region, we have gone from 10 megawatts (MW) of solar photovoltaic power in the UAE in 2009 to over 60 gigawatts (GW) by 2032 from announced projects across all six Gulf countries. The UAE made a bet on this transition. Our leaders recognised that the times called for new thinking on energy, and that we had much to gain by being its champion.

What is the UAE Energy Strategy 2050?

Given the recent dynamic changes in the energy sector, the maturity of emerging low-emission energy technologies, and the country's commitment to the objectives of the Paris Agreement, the UAE Energy Strategy 2050 was updated, setting goals for 2030 and ambitions for 2050 to reach net zero.

Will UAE achieve net zero by 2050?

In the first phase, which runs till 2030, the strategy aims to: achieve financial saving of AED 100 billion and mobilise investments between AED 150 and 200 billion by 2030 to ensure the energy demand is met and to sustain economic growth in the UAE. The picture below highlights the UAE's journey to achieve net zero by 2050.

Is 2023 a year of sustainability?

The move aligns with the declaration of H. H. Sheikh Mohamed bin Zayed Al Nahyan marking 2023 as the Year of Sustainability, under the theme 'Today for Tomorrow'. Updates in the UAE Energy Strategy 2050
