

UPS battery cabinet connection

Overview

How to install UPS & battery cabinet?

1. Installation sequence is as follows: 1.1 First, determine the installation location of the UPS and battery cabinet upon arrival at the site. 1.2. Install the battery connection Wires.

Where is the UPS battery cabinet located?

The battery cabinet may be located to either the right or left of the UPS cabinet. This procedure assumes the battery cabinet is located to the right of the UPS cabinet. 14. If line-up-and-match installation, remove the rectangular and circular knockout on the bottom and top front side of the UPS and the IBC-SW (see Figure 9). 15.

How to connect a UPS battery to a host?

F. Before connecting the battery cables from the battery cabinet to the host, measure the battery voltage with a multimeter, which should be 103.36V, and check if the positive and negative leads are correctly connected. If there is a battery box, connect the batteries in series and link them to the host as required. 2. UPS Battery Wiring Example A.

How do I connect a battery detect interface to a ups?

Route the battery detect interface wiring from the UPS battery detect interface terminals through the bottom of the IBC-SW to the wiring channel on the left side of the IBC-SW (see Figure 22). Route the wiring along the wiring channel to the IBC-SW battery interface terminal block TB2. See Figure 27 for terminal locations.
