What is a ups & how does it work?

UPS stands for Uninterruptible Power Supply. A UPS is a device that immediately takes over the power supply in the event of a power failure and supplies it to the connected systems. UPS stands for 'Uninterruptible Power Supply', translating to 'uninterrupted power supply'. UPS systems are also referred to as no-break or emergency power supplies.

What is Schneider Easy Ups 1 pH on-line?

Schneider Easy UPS 1 Ph On-Line is a versatile, high quality, cost competitive UPS developed to handle a wide voltage range and inconsistent power conditions. Easy UPS Line Interactive is an Uninterruptible Power Supply (UPS) designed for essential power protection in the most unstable power conditions.

How does a static ups work?

A static UPS operates on batteries that are activated instantly during a power outage. The batteries take over the power of the connected devices without interruption, ensuring that crucial business processes do not falter during a power outage. UPS systems each deliver a certain amount of VA (or MegaVA).
