

Victoria Industrial PV Panel Prices

Overview

What is the new commercial and industrial solar panel discount?

The new commercial and industrial solar panel (PV) discount will help businesses save on energy costs and electrify on-site equipment. All Victorian businesses and non-residential sites, such as community buildings, schools and hospitals, are eligible to apply for discounts to install a solar PV system.

How much do solar panels cost in Australia?

In Australia, solar panel costs can vary depending on where you live, but most households can expect to pay between \$3,000 and \$10,000 after government rebates. The final price depends on things like how big your system is, the quality of the panels and parts, and how much the installation costs.

How big should a solar PV system be?

The solar PV system you install must be between 30 kilowatts (kW) to 200 kW in size. The size of the solar PV system is the total power-generating capacity of all the solar panels. Please note, you may also be eligible to claim other incentives for your solar PV system in addition to any VEU program discount.

Is Australia a good place to buy solar panels?

As a sun-drenched continent, it continues to lead the world in per-capita solar adoption. The solar energy market in Australia has been booming, with more homeowners and businesses turning to solar power as a long-term solution to cut electricity bills and reduce carbon footprints. So, what is the solar panel cost in Australia today?
