Fuel power banks containing flammable liquids, corrosives, flammable liquefied gases and reactants when exposed to water or hydrogen gas in metal hydride must be carried in carry-on baggage and not be charged during flight. Each passenger can carry up to 02 power banks of this type.

Can a fuel power bank be carried on a plane?

Fuel power banks containing flammable liquids, corrosives, flammable liquefied gases and reactants when exposed to water or hydrogen gas in metal hydride must be carried in carry-on baggage and not be charged during flight. Each passenger can carry up to 02 power banks of this type. General notes.

How to protect a battery on a Vietnam Airlines Flight?

The battery must be separately protected to prevent activation during transport by re-packing, storing in a separate case/bag or taping to insulate the exposed terminals. Before a flight, passengers should contact Vietnam Airlines to understand the specific rules for batteries and devices with batteries.
