

Wellington 50 kW solar power generation

Overview

Does Wellington have a good solar system?

Despite its reputation for wind, Wellington's climate delivers strong solar generation potential, with systems producing up to 7.1 kWh per day during summer months while maintaining 2.2 kWh daily output in winter. This reliable performance ensures consistent energy production throughout the year.

Is Wellington a good place to invest in solar energy?

Enjoy clean, renewable energy on your terms with \$0 upfront. With 2,053 annual sunshine hours and moderate energy costs, Wellington presents a compelling case for solar energy adoption. The region's consistent solar performance and growing installation rates demonstrate the viability of solar power even in the windy capital.

How much does a solar system cost in New Zealand?

You can also start with a smaller system and scale up over time. In New Zealand: most residential homes would use a system between 1.5kW - 4kW. A panel-only no battery 4kWh system is around \$10,000. a 3kW grid-connected solar power system is popular because it helps reduce electricity costs, while remaining relatively affordable (around \$8,000).

Do solar panels need to be certified in New Zealand?

All panels and electrical work (including battery systems) need to comply with and be certified to New Zealand electrical standards. Installing solar panels can be a more cost effective and sustainable way to provide electricity for your home.
