

# **What is the battery cabinet used for testing**

## Overview

---

What is a battery test chamber?

Our battery test chambers are designed to test Lithium Ion batteries, lead acid, Battery Managements Systems (BMS), battery packs, modules, battery cells, and more. Our battery test chambers also offer many safety features that conform to IEC, UL and EUCAR testing standards for battery safety.

Why should you use a battery safety test chamber?

Battery failure can consist of leaking, rupture, fire, thermal runaway to an explosion. Battery safety testing in an environmental test chamber can help keep people and products safety. Weiss Technik provides pre-engineered battery test and battery safety chambers.

What is a battery charge & discharge test chamber?

The battery charge&discharge test chamber is a device specially designed for charging and discharging safety tests on batteries ( such as lithium-ion batteries).This type of test chamber can simulate the extreme charge and discharge conditions that the battery may encounter in actual use to evaluate.

What is a Sanwood battery charge & discharge test chamber?

Sanwood battery charge & discharge test chamber is a device specially designed for charging and discharging safety tests on batteries ( such as lithium-ion batteries).This type of test chamber can simulate the extreme charge and discharge conditions that the battery may encounter in actual use to evaluate the safety and stability of the battery .
