

Overview

Who makes the best solar string inverter?

We review the best grid-connect solar inverters from the worlds leading manufacturers Fronius, SMA, SolarEdge, Fimer, Sungrow, Huawei, Goodwe, Solis and many more to decide who offers the highest quality and most reliable solar string inverters for residential and commercial solar.

What are 'string' solar inverters?

This review focuses on common 'string' solar inverters, the most popular type. These inverters use one or more strings (groups) of solar panels connected in series. String solar inverters are the most common type used in the UK, Europe, Australia, and Asia. They are also growing in popularity in the US, where microinverters are extremely popular.

Which solar inverter is best?

In the end, there's no universal answer to which solar inverter is best. It depends on your roof structure, budget, energy habits, and long-term plans. While hybrid inverters, especially advanced MPPT hybrid inverter models, provide the intelligence and storage-readiness needed for future-focused energy systems.

What is a string inverter?

A string inverter is the most commonly used type of solar inverter, especially in residential and small commercial systems. It connects multiple solar panels (called a "string") to a single central inverter, which converts the collective DC electricity from the array into usable AC power.
