

Which tiles are best for solar installation

Overview

Are solar panels better than roof tiles?

Solar panels, that is solar panels on slate roofs, are still the better investment overall compared to solar roof tiles. Roof tiles are expensive because you are ultimately installing a new roof, and while they look great, they can be less efficient than solar panels.

Can solar tiles be used on a roof?

They are also fantastic for complex roofs with cross-gables, dormer windows, sloped gables, and other non-standard pitched roofs. In most cases, using solar tiles enables significantly larger solar installations (in terms of area) compared to traditional solar panels.

Are solar tiles a good choice?

Sometimes called 'invisible solar', solar tiles are also an excellent option for solar power upgrades to listed buildings or buildings in conservation areas. They are also fantastic for complex roofs with cross-gables, dormer windows, sloped gables, and other non-standard pitched roofs.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.
