

Zagreb power base station query

Overview

How is electricity supplied in Croatia?

Customers in Croatia are supplied with electricity from power plants in Croatia, from power plants built in neighboring countries for Croatia's needs and with electricity procured from abroad. By its size, the Croatian power system is one of the smallest power systems in Europe.

What is a Croatian power system?

The Croatian power system comprises plants and facilities for electricity production, transmission and distribution in the territory of the Republic of Croatia.

Why is the Croatian power system interconnected with other countries?

For the security reasons, quality of supply and exchange of electricity, the Croatian power system is interconnected with the systems of neighboring countries and together with them it is connected into the synchronous network of continental Europe.

Is Croatian power system a transit system?

By reconnecting the UCTE synchronous zones 1 and 2, the Croatian power system has become a transit system again. The Croatian power system is a control area by HOPS. Together with the Slovenian power system and the power system of Bosnia and Herzegovina it constitutes the control block SLO - HR - BIH within the ENTSO-E association.
