

Zambia 5w solar panel power generation

Overview

Will Zambia increase its solar power capacity by 2030?

The Zambian government has set a target to increase its installed solar and wind capacity to 600 MW by 2030. However, the current installed capacity for solar photovoltaics is only 90 MWp, indicating significant underutilisation of Zambia's potential in the renewable energy sector.

How many Zambians are still without electricity?

Solar home systems, which are rooftop solar panels that provide electricity for lighting, charging phones and running certain appliances, and mini grids, which are solar electricity generation and storage plants that provide electricity to whole villages – have the potential to reach 8.5 million Zambians currently still without electricity.

Does Zambia need a new energy source?

LUSAKA, April 1, 2025 – Access to electricity in Zambia has risen from 30% in 2017 to currently nearly 50%. Whilst half of the population is connected, the remaining half will require new energy solutions. Zambia currently relies on hydropower for 80% its electricity generation, but recent droughts have shown the limitations of this energy source.

Will Zambia invest in off-grid solar energy?

In collaboration with the World Bank, the Common Market for Eastern and Southern Africa (COMESA), the Africa Minigrad Development Association (AMDA), and other partners, the Government of Zambia is redoubling its efforts to invest in off-grid solar energy throughout the country to connect all Zambians.
